6636675	Aged Wood								100
6636676	Silver Grey								100
6636677	Ipe								100
6636678	Teak								100

Unique and stylish finish for your composite or hardwood decking and cladding with steel substructures.

The advantages of this screw are:

- 316 stainless steel with additional zinc coated steel tip offers a high degree of weather resistance.
- The self drilling tip makes the installation quick and easy.
- Small head diameter ensures that the head can sink in cleanly and easily.
- Timber is protected from tearing or splitting by the drill tip.
- Smooth head for a perfect barefoot proof finish.
- **8 different colour matched heads** *(Silver Grey, Black, Blackbutt, Ipe, Beech, Teak, Aged Wood, Antique).*
